Mechatronics & Embedded Systems Architect fusing industrial automation (Siemens S7, Factory I/O, Laser CNC, EPLAN) with cutting-edge robotics (UR-5), zero-router wireless mesh (ESP32-C6 ESP-NOW <10ms), Android hardware integration (Kotlin/BLE/RS-232), and real-time React 19 Canvas MES software. Rapid ROI via micro-downtime elimination (-40%), oven energy optimization (71.1k PLN/yr gas savings), and pre-commissioning in Factory I/O.

COMMERCIAL ENGINEERING EXPERIENCE & PLANT OPERATIONS

Industrial Automation & Commissioning Engineer Goodvalley Agro-Industrial Complex — Przechlewo, Poland › Commissioned and modernized industrial food processing machinery, packaging lines, and high-speed conveyors. › Refactored Siemens S7 (TIA Portal) PLC software logic: eliminated sensor lags, kinematic dead times, and cut downtime by -40%. › Architected and deployed plant MES platform, workTime WFM dispatching, and distributed ESP-NOW wireless mesh telemetry nodes. › Automated data acquisition and telemetry from industrial energy meters; developed custom warehouse software for parts/tool picking.	2025 – Present
Industrial Automation & Embedded Engineer Colorland / Industrial Systems Engineering — Rzeszów & Poland › Engineered 3D production line simulations in Factory I/O with Siemens PLCSIM, Modbus TCP and OPC UA for virtual commissioning. › Developed OpenCV computer vision pipelines for industrial image analysis & inspection; integrated UR-5 with Sick vision (+35%). › Designed custom hardware interface modules for machine integration; reverse-engineered internal machine data protocols. › Operated CNC laser cutting with nesting optimization; mechanical design in AutoCAD, Fusion 360, SolidWorks, EPLAN.	2024 – 2025
Lead Automation Engineer (Główny Automatyk) Fabryka Ciastek San-Pajda — Jarosław, Poland › Modernized coordinate dosing algorithm for meringue baking: boosted tray capacity by +33%, saving 71,124 PLN/year in gas fuel. › Deployed SCADA/MES turbomixer multi-machine integration in 57 days (25.4k PLN budget); supervised UR plant maintenance.	2023 – 2024
Android & Embedded Hardware Developer / Control Cabinets MostCentrService, KasaMobile & ZUT Kunzek — Poland & Ukraine › Developed KasaMobile & SmartShop Android apps (Kotlin, Jetpack Compose, Clean Architecture, Hilt, Room, Coroutines/Flow). › Engineered Bluetooth (BLE/SPP) & RS-232 protocols for Posnet, Novitus & Elzab fiscal printers, industrial scales, and ML Kit scanning. › Prefabricated industrial control cabinets (szafy sterownicze: PLCs, VFDs, safety relays) and executed EPLAN I/O loop checks.	2021 – 2024

KEY INDUSTRIAL PROJECTS & PRODUCTION DELIVERABLES

San-Pajda Turbomixer & Oven Energy Optimization: SCADA linking 2 machines in 57 days (25.4k PLN); coordinate dispensing gave +33% oven capacity & 71.1k PLN/yr verified gas savings.

Colorland Virtual Commissioning & Laser CNC: Factory I/O simulations with Modbus TCP/PLCSIM; CNC laser cutting with nesting optimization; UR-5 + Sick vision sorting (+35%).

Industrial MES & Digital Twin Platform: Python (FastAPI) + React 19 Canvas 60 FPS shopfloor telemetry; Order -> MES -> Edge pipeline (SLA ≤12h); Zero Punch Loss.

MostCentrService & KasaMobile Hardware POS: Android (Kotlin/Compose) app communicating via BLE/SPP & RS-232 with Posnet/Novitus/Elzab fiscal printers and industrial scales.

CORE COMPETENCIES MATRIX (ATS KEYWORD GROUPING)

PLC & Automation:	Siemens S7 (TIA Portal), OpenCV (Vision/Image Analysis), IEC 61131-3, Factory I/O, PROFINET, Modbus, IO-Link, UR-5
CAD & Fabrication:	AutoCAD, Fusion 360, SolidWorks, EPLAN (Electric P8), Laser CNC (G-code, Nesting), Szafy Sterownicze (VFD, Safety Relays)
Mobile & Android:	Kotlin, Jetpack Compose, Coroutines & Flow, Hilt, Room, Clean Architecture, Bluetooth (BLE/SPP), RS-232, CameraX / ML Kit
Embedded & Mesh:	C/C++ (PlatformIO), FreeRTOS, ESP-IDF, ESP32-C6 (ESP-NOW Mesh <10ms), STM32, Edge Linux (Raspberry Pi, Read-Only Rootfs)
Full-Stack & Lead:	Python (FastAPI), React 19 Canvas (Digital Twins), SQL, Docker, Agile/Scrum (Jira), Lean & OEE (+33%), ISO Audit, 493 ECTS

ACADEMIC CREDENTIALS, TARGET ALIGNMENT & TERMS

Education: Mgr (M.Sc.) Management (120 ECTS) · Inż. (B.Sc.) Computer Science (213 ECTS) · Inż. (B.Sc.) Automation & Electronics (160 ECTS) — PANS (493 ECTS Total, 1,880h+ Practicum)

Target Roles: CTO / Tech Lead · Head of Automation & R&D · Lead Embedded & IIoT Architect · Industrial MES Architect · Senior Automation Engineer

Compensation: Open to Company Offers (B2B + VAT / UoP) · **Availability:** Immediate / 2 Weeks · **Mode:** Remote (EU) / Hybrid / Travel
